Subject: Volunteer Sampling Opportunity

Hello Everyone,

We need your help!

Florida River Water Quality Sampling Project

Join us for training on Friday June 12th, 2015.

We will meet at 9:30 am until about 12:00 depending on driving times and questions. The training will take place at the Animas River in Bondad. Meeting place will be at the south end of the Walmart parking lot.

This project involves sampling for E.coli and Nutrients at 4 sites. Volunteers are needed to visit 4 sites on the Animas and Florida Rivers to collect and record water samples, and to drop the day's sample bottles off at two labs in Bodo Park. Sampling does not involve getting in the water. The entire process will regularly take about 2.5 hours or less. You need to have your own car. Sampling does not involve getting in the water.

Planned sampling dates are as follows: June 8th, 22nd, July 6th, 20th, August 3rd, 17th, 31st, September 14th, 28th, October 10th, 11th, November 9th, 23rd, and December 7th.

Commitment is key with all volunteers. If you can commit to 2 or more of these dates, let me know ASAP and I will fill you in for that slot.

If you cannot attend the training on the 12th, but are interested in volunteering to collect water samples please email me and we can work out another time for training.
